Technical Skills

Languages: Java, Go, SQL

Backend & Data: Spring Boot, PostgreSQL, Redis, Kafka, REST APIs, React

Cloud & Tools: Docker, AWS, Git, DSA, LLD

Experience

Open Source Contributor

June 2026

Docker – docker/docker-agent PR #3088

Remote

- Fixed a Windows path-expansion bug in Docker Agent by correcting `~` expansion to respect the `HOME` environment variable instead of `USERPROFILE`, merged into Docker main after maintainer review
- Added test coverage for custom `HOME` overrides on Windows to prevent regressions

Software Development Engineer (SDE) Intern

June 2025 – July 2025

Ultimez Technologies

Remote

- Built CryptoTrack, a full-stack crypto tracker (React, Node.js) with live API feeds, JWT authentication, and MongoDB-backed watchlists, cutting page load time by 35%
- Integrated AWS S3 storage to enable real-time portfolio visualization for end users

Projects

Opsmind-AI (DevOps AI Gatekeeper) | Go, React, pgvector, CI/CD

 Demo

- Built an autonomous PR-review system integrated via CI/CD (GitHub Actions) and webhooks, orchestrating 3 parallel AI agents to flag issues pre-merge in 3–8 seconds
- Built a concurrent Golang backend (goroutine worker pool, HMAC-verified webhooks) with PostgreSQL + pgvector semantic search over architecture rules
- Built a live React dashboard with an SSE-streaming RAG chatbot and an MLOps feedback loop to track and improve flagging accuracy over time

Adaptive Rate-Limiting Trading Engine | Java, Spring Boot, Redis, Kafka

- Built an in-memory order-matching engine (ConcurrentSkipListMap) with price-time priority and partial fills, covered by 7 tests including a race-condition regression test
- Implemented volatility-aware rate limiting (Redis Token Bucket) that tightens capacity from 10 to 4 requests when price swings exceed a 3% threshold
- Built a circuit breaker with trade events streamed via Kafka to PostgreSQL, achieving ~91ms average latency under load

Achievements

- **LeetCode** (Divyansh_Srivastav): 476+ problems solved (134 Easy | 285 Medium | 57 Hard), max contest rating 1443
- Contributed a merged open-source PR (cli-printing-press PR #2900), fixing a Windows-specific CI failure in a public Go CLI tool
- Completed the **Google Cloud Skills Boost Arcade Program** – 40+ skill badges and 169 hands-on labs across Cloud and DevOps tracks
- Co-authored “A Hybrid Ensemble Machine Learning Approach for Early Detection of Human Heart Disease,” published in ICAICCIT, IEEE Xplore
- Ranked in national Top 400 (Top 5%) at HackWithIndia
- Won 1st Position at the BIS Ideathon (Bureau of Indian Standards National Innovation Challenge)

Education

KIET Group of Institutions (AKTU)

B.Tech in Information Technology; CGPA: 7.89/10.0

Ghaziabad, India

Nov. 2022 – July. 2026

Certifications

- AWS Certified Cloud Practitioner (CLF-C02)
- Google Cloud Generative AI Fundamentals Certification
